

204xx Accessories for Buoyancy Transmitters

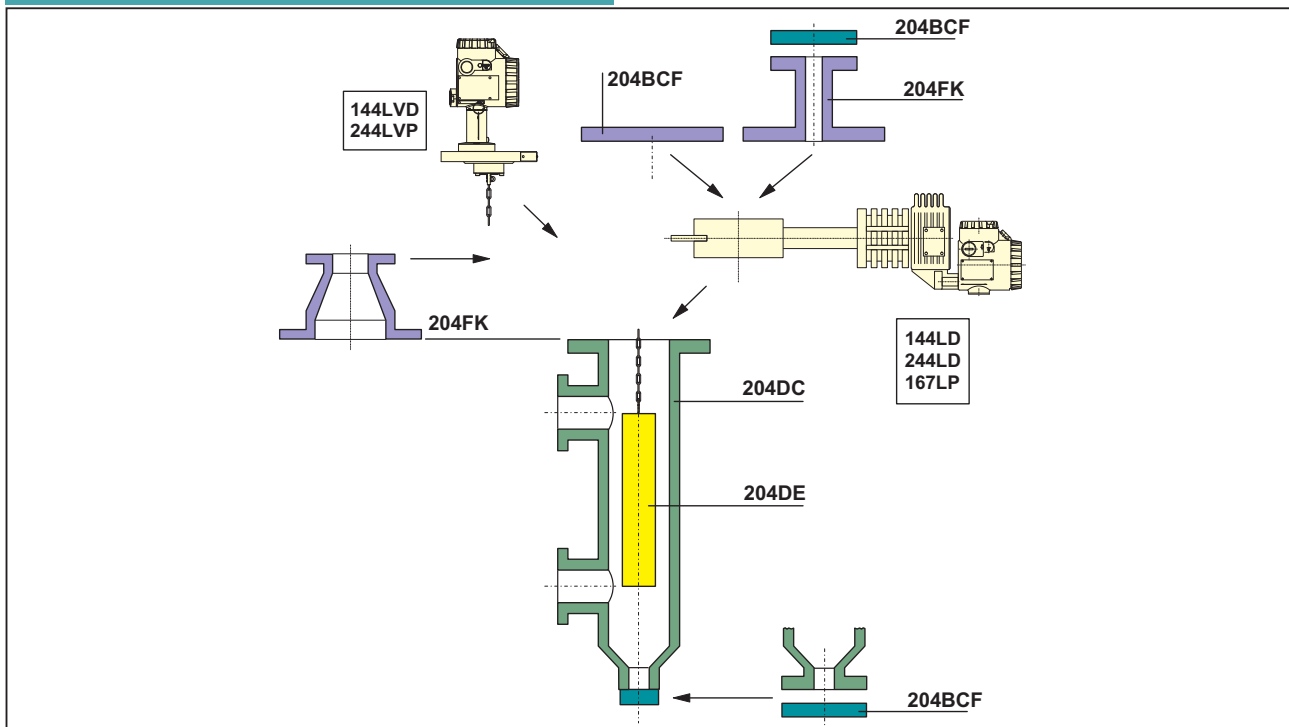

Buoyancy transmitters to measure liquid level, interface and density are used for open or closed vessels or containers. They can be mounted directly on top of the vessel, or if the application requires, on a side mounted cage. Depending on application and vessel design various installation accessories and the applicable displacer have to be selected.

FEATURES

- Universally applicable for all FOXBORO ECKARDT buoyancy transmitters with displacers
- Various connections, dimensions and materials
- Displacers with custom dimensions and material
- Standards according to DIN and ANSI
- Certification according to "Pressure Equipment Directive" PED
- Certification for use in Zone 0
- Certified as part of an overfill protection according to WHG

ACCESSORIES OVERVIEW

Accessories consisting of:

204DE	Displacer element	page 4
204DC	Displacer chamber	page 8
204FK	Flange combination	page 19
204BCF	Flange kit	page 25

Selection criteria

The accessories can be used with following types of transmitters:

Type	max. stat. pressure	Accessories			
244LVP	PN 150 / class 900	204 DE	204 DC	204 BCF	204 FK
144LVD	PN 500 / class 2500	204 DE	204 DC	204 BCF	204 FK
244LD 144LD 167LP	PN 250 / class 1500	204 DE	204 DC	204 BCF	204 FK

Safety requirements

The accessories dimensions correspond to the appropriate DIN and ANSI standards.

For the accessories only tough materials are used according to the AD instruction sheet series W or the material selection sheets VdTÜV

Application in Zone 0 / as part of an overfill protection (WHG)

If the transmitter and the displacer 204DE are permitted for use in Zone 0, the remaining accessories can be used without any restriction.

Carbon Steel (1.0460): min. thickness of material to be 3 mm (0.12 inch).

Displacer chambers

Calculation, manufacturing and testing corresponding to requirements of AD instruction sheets series B and HP.

Displacer sizing is according to the "Pressure Vessel Regulation".

Non-standard displacer chambers can be certified by TÜV.

DECLARATION OF CONFORMITY

- Directive 97/23/EC (according to Annex VII)

We herewith declare in sole responsibility, that the products:

Buoyancy Transmitter
Types: 244LD, 167LP and their accessories

comply with the Pressure Equipment Directive 97/23/EC and the AD 2000-Instructions, TRB

Applied conformity assessment procedures:
Module B and D
EC-Type-Examination and Quality Assurance for Production

For these products the following EC-Certificates are existing:
P-IS-DDB-MAN-12-07-17329989-001
DGR-0036-QS-1021-11

The engaged Notified Body is:
TÜV SÜD Industrie Service GmbH, Dudenstr. 28, D-68167 Mannheim

Application considerations

For all accessories exposed to the process, the following pressure / temperature ranges with references to the selected material are applicable:

Detailed specifications for the materials with respect to chemical composition, temperature, limits of application and kind of certification according to EN 10 204, AD 2000 and EN 13 445.

Displacer 204DE

Transmitter	Displacer	
	204DE-S	204DE-T
	typical density ranges [kg/m ³]	
244LD, 244LVP	250 ... 2000	300 ... 600
144LVD	550 ... 1500	250 ... 1000
167LP	550 ... 1500	125 ... 500

Check for use in a displacer chamber

The diameter of displacer must be at least 10 mm smaller than the inside diameter of the displacer chamber!

Pressure Rating

The displacer must be designed for the pressure rating of the vessel - however, at least to the operating pressure - and ordered accordingly. Here the maximum possible temperature must be taken into consideration.

Displacers made of PTFE are made from solid material, and are, therefore, suitable for all pressures (Note the temperature).

Divided displacers

Displacers with a length of more than 3 m (1 m with PTFE) are divided. The displacer elements are screwed together and secured with the wire clip **151** to avoid bending or damage during insertion into the vessel. The elements of displacers with $\varnothing < 13$ mm are not screwed together; they are secured with hook and eyelet **152**. Additional securing is not necessary ¹⁾.

Lengths < 350 mm or > 3000 mm, and density ranges < 300 kg/m³ or > 2000 kg/m³ on request.

Mechanical vibrations

If the transmitter is exposed to external vibrations by means of the installation, it is recommended to order the displacer with a damping spring (Model Code Option -C or -D) which is attached to the suspension chain.

It is hooked onto the suspension chain of the displacer in place of 7 chain links (105 mm). This spring is specially matched to the resonance frequency of the displacer and is made of stainless steel 1.4310 (max. operating temperature 250 °C) or HC (max. 350°C).

Use in Zone 0 or as Overfill protection acc. to WHG ²⁾

Mechanics

When used in Zone 0, displacers must be secured against oscillating when

- displacer made of metal, explosion group IIC
- displacer made of metal, explosion group IIB/A, length > 3 m
- displacer made of PTFE+25% carbon, IIC/B/A, length > 3 m

The displacer is to be attached in such a way that it is not in the main filling jet stream.

When used as overfill protection according to WHG, the displacer must always be installed with guidance.

Guidance devices over 3 m long must also be secured against bending.

Potential equalization

When used in Zone 0, only displacers of metal or PTFE +25 % carbon may be used.

A potential equalization line must be mounted as an electrical bypass of the displacer suspension(s) if the residual displacer weight is < 10 N, or if more than 6 contact points are present.

To avoid the danger of electrostatic ignition, a connection to the transmitter with good conductivity must be ensured.

The volume resistance between the lower end of the displacer and ground may not exceed 1 M Ω .

MATERIALS, PRESSURE RATINGS, SUITABLE SIZES

see Model Codes on following pages.

1) When used in Zone 0, the eyelets must also be welded.

2) See corresponding certificates for further details

- 4) $\Delta\rho = \rho_1 - \rho_2$ mit ρ_1 = density of lower medium, ρ_2 = density of upper medium
- 5) Displacers made of metal can cause small deviations in diameter, volume and weight
- 6) For measurement of interface or density, the max. density of the lower medium is 1350 kg/m³

Dimensionioning

b is the length of the suspension and L is the length of the displacer = Measuring length (Fig. A).

p is the distance between the upper edge of flange #1 to the center of flange #2,

h is the distance between the two flanges #2 / #2.

In a typical application, b = p and L = h (Fig. B).

When ordering, specify the dimensions L and b as well as the physical data such as pressure, nominal size, etc.

When ordered including displacer chamber (see page 8), dimension b must not be specified when the displacer length L is equal to the flange distance h.

MODEL CODES 204DE

210714

Displacer for Buoyancy Transmitters from 2N buoyancy up to 20N 204DE

RANGE OF APPLICATION: (a)

- Liquid Level - Media: Liquid / Gas or Air
(Density difference = 250 kg/m³ to 2000 kg/m³)
(= 9x10⁻³ lbm/in³ to 72.2x10⁻³ lbm/in³) -S
- Interface Level / Density - Media: Liquid 1 / Liquid 2
(Density difference = 300 kg/m³ to 600 kg/m³)
(= 10.8x10⁻³ lbm/in³ to 22.7x10⁻³ lbm/in³) (g)(h) -T

DISPLACER MATERIAL:

- 316L (1.4404 / 1.4435 / 1.4571) S
- 321 (1.4541) H
- PTFE (not for applications in Zone 0) P
- PTFE with 25% Carbon O
- Hastelloy C. C
- Inconel 625 (2.4856) (e) R
- Monel 400 (2.4360) (e) M
- Titan (3.7035) (e) T

PRESSURE RATING:

- Up to PN 100 / Class 600 D
- Up to PN 160 / Class 900 E
- Up to PN 250 / Class 1500 F
- Up to PN 500 / Class 2500 G

SUITABLE FOR FLANGE SIZE: (at Top of vessel/chamber)

- DN 50. 0
- DN 70. 1
- DN 80. 2
- DN 100 3
- DN 150 4
- 2 inch 5
- 3 inch 6
- 4 inch 7
- 6 inch 8

DISPLACER LENGTH "L": (inches are approx.)

for Displacer Material codes P and O:

- 300 mm (12 in) to 2000 mm (79 in) without partitioning A
- 2001 mm (79 in) to 4000 mm (157 in) One partition point B
- 4001 mm (157 in) to 6000 mm (236 in) Two partition points C
- 6001 mm (236 in) to 8000 mm (315 in) Three partition points D
- 8001 mm (315 in) to 10000 mm (394 in) Four partition points E
- 10001 mm (394 in) to 12000 mm (472 in) Five partition points F

for Displacer Material S, H, C, R, M and T:

- 300 mm (12 in) to 3000 mm (118 in) without partitioning K
- 3001 mm (118 in) to 6000 mm (236 in) One partition point L
- 6001 mm (236 in) to 9000 mm (354 in) Two partition points M
- 9001 mm (354 in) to 12000 mm (472 in) Three partition points N
- 12001 mm (472 in) to 15000 mm (591 in) Four partition points O

MODEL CODES 204DE (continued)

OPTIONS:

for application in Zone 0 (Additional grounding rope) (not available with Displacer Material: P)	-E
Damping Spring (Mat. 1.4310, max. 250 °C (482 °F)) (f)	-D
Damping Spring (Mat. HC, max 350 °C (662 °F)) (f)	-C
Free of oil and fat	-O
Density difference > 300 kg/m ³ (a)	-K
Tag No. Labeling Stainless Steel Label Fixed With Wire (Text required)	-L

Certificates

EN 10204-2.1 Certificate Of Compliance	-1
EN 10204-3.1 Inspection Certificate Of Process Wetted Material (not available with Displacer Material: P and O).	-3
PMI - Test (not available with Displacer Material: P and O)	-5

- (a) Upper and Lower Medium Density required (at operating temperature)
- (b) Only in connection with Modelcode 204DC
- (c) Exact length required (Contact face of flange to upper end of displacer)
- (d) +/- 8 mm (+/- 0.3 inch)
- (e) On ECEP request
- (f) Required for 244LD with Option -G
- (g) Consult factory if pressure rating is F or G
- (h) Option K required

DISPLACER CHAMBER 204DC

A displacer chamber is mounted on the side of the vessel, and the transmitter at its top flange.

Displacer chambers are offered in four vessel mounting arrangements (see illustration right: "Side-Side").

All mounting arrangements are also available with **heating jacket**.

The valves, etc. are to procure on site.

For use as a part of an overfill protection, the same length "L" of displacer and "h" of chamber is required.

Materials,
Pressure Ratings,
Flange Sizes,
Contact Faces,
Pipe Sizes,
Drain Types: Flange, Screw, Pipe piece for welding
Heating Jacket

see Model Codes on following pages.

Overview: Types of Transmitters

We offer both Level transmitters for flange mounting and for sandwich assembly, depending on the measurement task.

Flange mounted devices
 shown: with 244LVP

Sandwich mounted devices
 shown: with 244LD

With sandwich mounted devices an additional blanking flange 204BCF could be required. Please order separately.
 Also available without venting plug.

Overview: Mounting arrangements

*') only possible with sandwich mounted devices:
 • 244LD • 144LD • 167LP

Overview: Versions / Options

An additional blanking flange 204BCF has to be ordered separately. (see page 25).

Displacer chamber connections

Example: Displacer chamber "Connection Side-Side"

- #1 Connection flange (to transmitter)
- #2 Chamber connection flange
- #3 Drain flange
- #4 Drain plug or Drain valve

DIMENSIONS Displacer chamber 204DC: Mounting arrangements (Mounting Types)

When ordering, specify the dimension h and physical data such as pressure, nominal size, etc. Therefrom, the dimensions p, e, f and g will be derived, see tables from page 11. Other dimensions of p, e, f, g, as a special version.

FLANGE COMBINATION 204FK

The flange combination consists of a piece of pipe welded between two flanges.

204FK Flange combination...

... for adapting different flange sizes

... simplified service inspection without removing the transmitter screws

... Reduction of flange size with displacer chamber with Side-Top (-ST) or Top-Bottom (-TB) design or for any other pipe extension

**Materials,
Flange size #1,
Flange size #2,
Static pressure rating,
Contact face**

see Model Codes on following pages.

The flange combination will be supplied with gasket(s), bolts and nuts for connection to the transmitter.

FLANGE KIT 204BCF

Cover flange kit

The cover flange kit is necessary for the sandwich type torque tube transmitters 244LD, 144LD and 167LP.

Two seals, studs and nuts are included. Vent plug is optional.

Blind Flange Set

The Blind Flange Kit is required to close both the drain flange and the top mounted flange combination, if no other additionally equipment is connected.

One seal, studs and nuts are included. Vent plug is optional.

Flanges; dimensions

MODEL CODES 204BCF

Blanking flange kit (flange, gasket, nuts and bolts)	204BCF	310114
MATERIAL		
Carbon Steel (A-105) application from -10 °C to 350 °C (d) . . -K		
1.4571 (316 Ti) . . . application from -196 °C to 500 °C (d) . . -E		
1.4404 (316 L) (1.4435 with FLANGE SIZE: 15, 16 and CONTACT FACE: H) application from -196 °C to 500 °C -S		
1.4541 application from -196 °C to 500 °C (d) . . -H		
1.4462 (Duplex) application from -10 °C to 280 °C (d) . . -N		
2.4856 (Inconel 625) . . application from -10 °C to 450 °C (d) . . -R		
2.4858 (Inconel 825) . . application from -10 °C to 450 °C (d)(l) . -I		
Hastelloy C application from -196 °C to 400 °C (d) . . -C		
FLANGE SIZE		
DN 15 (b) 11		
DN 20 (not for PRESSURE RATING: E, F, G, H) (b) 12		
DN 25 13		
DN 50 14		
DN 70 (l) 15		
DN 80 16		
DN 100 17		
1/2 inch (b) 18		
3/4 inch (b) 19		
1 inch 20		
2 inch 21		
3 inch 22		
4 inch 23		
PRESSURE RATING		
PN 16 (with flange size -11, -12, -13, -14, -16, -17) A		
PN 25 / PN 40 (with flange size -11, -12, -13, -14, -16, -17) B		
PN 63 (with flange size -14, -16, -17) C		
PN 100 (with flange size -11, -13, -14, -16, -17) D		
PN 160 (with flange size -11, -13, -14, -16, -17) E		
PN 250 (with flange size -11, -13, -14, -16, -17) F		
PN 400 (with flange size -16) (b) G		
PN 500 (with flange size -15) (b)(l) H		
Class 150 (with flange size -18 to -23) I		
Class 300 (with flange size -18 to -23) J		
Class 600 (with flange size -18 to -23) K		
Class 900 (with flange size -18 to -23) L		
Class 1500 (with flange size -18 to -23) M		
CONTACT FACE		
Type B1 according DIN EN 1092-1 (available with pressure rating A, B) M		
Type B2 according DIN EN 1092-1 (available with pressure rating A to G) O		
Type C according DIN EN 1092-1 (available with pressure rating A to G) (k) . . P		
Type D according DIN EN 1092-1 (available with pressure rating A to G) (k) . . Q		
Type E Spigot according DIN EN 1092-1 (available with pressure rating A to G) X		
Type F Recess according DIN EN 1092-1 (available with pressure rating A to G) Y		
Type L (available with pressure rating D, E, F, G) L		
Type L Lens High pressure (available with IG- Standard for Pressure Rating H and Lens according DIN 2596 with pressure rating G) H		
Type RF/SF (available with pressure rating I to M) -- RF Raised Face per ANSI B16.5 R		
Type RJF (available with pressure rating I to M) -- RJF Ring Joint Face per ANSI B16.5 (with flange size -18, -19 and pressure rating "I" not with contact face "J") J		
Type LM Large Male according ANSI B16.5 (with PRESSURE RATING I, J, K, L, M) W		
Type LF Large Female according ANSI B16.5 (with PRESSURE RATING I, J, K, L, M) Z		
Type LT Large Tongue according ANSI B16.5 (with PRESSURE RATING I, J, K, L, M) (k) . . A		
Type LG Large Groove according ANSI B16.5 (with PRESSURE RATING I, J, K, L, M) (k) . . B		
Type ST Small Tongue according ANSI B16.5 (with PRESSURE RATING I, J, K, L, M) (k) . . G		
Type SG Small Groove according ANSI B16.5 (with PRESSURE RATING I, J, K, L, M) (k) . . U		
(continued on next page)		

MODEL CODES 204BCF (continued)

GASKETS

Graphit (with CONTACT FACE Q, P, A, B, G, U) (d)	G
Carbon Steel (with MATERIAL K) . . (not with CONTACT FACE P, Q, A, B, G, U) . . (c)(d)	K
1.4571 (316 Ti) (with MATERIAL E) . . (not with CONTACT FACE P, Q, A, B, G, U) . . (c)(d)	E
1.4404 (316 L) (with MATERIAL S) . . (not with CONTACT FACE P, Q, A, B, G, U) . . (c)(d)(l)	S
1.4541 (with MATERIAL H) (not with CONTACT FACE P, Q, A, B, G, U) . . (c)(d)(l)	H
1.4462 (Duplex) (with MATERIAL N) (not with CONTACT FACE P, Q, A, B, G, U) . . (c)(d)(l)	N
2.4856 (Inconel 625) (with MATERIAL R) (not with CONTACT FACE P, Q, A, B, G, U) (c)(d)(l)	R
2.4858 (Inconel 825) (with MATERIAL I) (not with CONTACT FACE P, Q, A, B, G, U) (c)(d)(l)	I
Hastelloy C (with MATERIAL C) (not with CONTACT FACE P, Q, A, B, G, U) . . (c)(d)(l)	C
Without gasket, with CONTACT FACE H	X

BOLTS and NUTS

Bolts w. antifatigue shaft (long) + nuts for transm. sandwich mounting a. product temp. > -10 °C (Steel)(f)	1
Bolts w. antifatigue shaft (long) + nuts for transm. sandwich mounting a. product temp. > -196 °C (SS) (f).	2
Bolts with antifatigue shaft (short) and nuts for flange connection and product temp. > -10 °C (Steel) (h)	3
Bolts with antifatigue shaft (short) and nuts for flange connection and product temp. > -196 °C (SS) . (h).	4

OPTIONS

Free of oil and fat	-O
Vent Plug G 3/4	-A
Vent Plug NPT 3/4.	-B
Tag No. Labeling	
Stainless steel label fixed with wire	-L
Certificates	
EN 10204-2.1 Certificate of Compliance	-1
EN 10204-3.1 Inspection Certificate Of Process Wetted Material	-3
Comply with NACE Standard MR-01-75 (a)	-6

- (a) Restrictions concerning the limit of application for the used materials are considering (NACE Standard MR-01-75/2003, resp. ISO 15156)
- (b) Not with OPTION: -A, -B
- (c) Spiral gaskets including Graphite
- (d) Not CONTACT FACE: H
- (f) Only for Flange size -15, -16, -17, -22, -23
- (h) Not FLANGE SIZE: 15
- (k) Only GASKET: G
- (l) Not released

Accessories are matching for following Transmitters:

Product Specification: Device:

PSS EML0710	244LD	Intelligent Buoyancy Transmitter for Liquid Level, Interface and Density with Displacer and Torque Tube
PSS EML1710	244LVP	Intelligent Buoyancy Transmitter for Liquid Level, Interface and Density with Displacer
PSS EML0110	167LP	Pneumatic Buoyancy Transmitter for Liquid Level, Interface and Density with Displacer and Torque Tube
